

**Christopher J. Tice**

**Senior Vice President and General Manager,  
Verification Acceleration Group**

Christopher Tice serves as senior vice president and general manager of the Cadence Verification Acceleration group. Verification Acceleration provides market leading hardware based solutions for functional verification.

Tice was formerly vice president of Worldwide Support Services for Quickturn, responsible for corporate support, time-to-market engineering, maintenance, training, and processor based technology. Tice joined Quickturn in 1993 as director of Worldwide Support Services. Previously Tice was director of Application Services

for PiE Design Systems before its merger with Quickturn. Prior to joining Quickturn and PiE, Tice was general manager for the Processor Business Group at Weitek where he was responsible for SPARC, co-processor, printing, and workstation graphics product development, marketing, and manufacturing. While at Weitek, Tice previously served as the international design consulting manager and also designed the first co-processor for the 80386. Previous to Weitek, Tice was project leader for ECL super-mini computer design for Harris Corporation in Florida. Tice also served on the board of directors for East Hills School, a non-profit education corporation.

Tice received his bachelor of science degree in electrical engineering with honors from the University of Florida and attended the MBA School at Florida Atlantic University.
